Feeds Your Engine

ANNOUNCEMENT N° 1
INSTITUTE OF TECHNOLOGY AND LIFE SCIENCES

JOHN DEERE

JOHN DEERE POLSKA SP. Z O.O.

Invite You to participate
International Scientific Conference:
**BIOFUELS FOR AGRICULTURE
AND RURAL AREA DEVELOPMENT**

under the auspices of
Mr. Marek Sawicki
Minister of Agriculture and Rural Development, Poland

Conference to be held at ITP's Warsaw Branch
Poland
from May 31th to June 1st, 2011

BIOFUELS FOR AGRICULTURE AND RURAL AREA DEVELOPMENT

Warsaw, May 31st - June 01st, 2011

OBJECTIVE OF THE CONFERENCE

The primary objective of the conference is to summarize knowledge and experience in production and use of liquid fuels from renewable resources of agricultural origin. Will address the issues of biofuels production technologies, the possibility of their use in internal combustion engines currently in use and the directions of research on the adaptation of engines to supply biofuels. Ongoing discussion will cover the technological issues, environmental and economic aspect of consideration is the impact of legal requirements on the current state and future use of oil. Starting point for discussion will be experienced with the implementation of the project 2ndVegOil under which exploited tractor driven by pure vegetable oil. The conference will create a space for discussion and exchange of experiences and views on the use of liquid biofuels with the participation of scientists, agricultural machine producer and their immediate users - the farmers. Due to the presence of participants outside Poland, including Germany, Austria and France enable an exchange of experience acquired in different economic and legal means in other environments.

PROBLEMS OF THE PLANNED SESSION

Scheduled working sessions:

1. Liquid fuels produced from agricultural raw materials - technology of production, technical aspects of the use biofuels as a fuel for internal combustion engines, the prospects of biofuel in agriculture.
2. Environmental, economic and legal production and use of biofuels in agricultural tractors and machinery. Organization of biofuel production for farmers own needs, systems of the use of machinery powered by biofuel. Biofuels as an element of entrepreneurship development i rural areas, possibility of diversifying production and a potential growth factor in profitability in agricultural production.

COST OF PARTICIPATION AND CONFERENCE'S LANGUAGE

Admission is free.

The conference languages are Polish and English. Organizer provides simultaneous translation.

FURHER INFORMATIONS WILL BE FOUND IN THE ANNOUNCEMENT N° 2
